## PRESIDENT'S MESSAGE:

President's Message: Is it going to rain today? Does it look like it will clear up anytime soon? Did the utilities get marked? Everything but telephone..... Those are common phrases heard in our office so far this summer. It's been a wet, yet busy summer for me and all of you I hope. Personally, it's been a great mix of heat during the day and cool nights. Our summer meeting is July 20, 2017 at Northbrook Country Club in Luxemburg. The meeting starts at approximately 6pm for Social hour and the dinner will be at 6:45. If you are interested in golfing, please get in touch with Tom Leslie and let him know. If you would like to trap shoot, Aaron Ballast is the man you need to speak with. Shoot him an email ([tntpls@tntsurveyors.com](mailto:tntpls@tntsurveyors.com)) and let him know. Also, please let Tom know if you are coming to the meeting. An accurate head count saves the chapter money by not having to guess at the number of meals we need to order. Please take the 5 minutes and send him an email or give him a call as soon as you can. Lastly, the Northeast Chapter is hosting the WSLs Summer Meeting this year on July 28-29. The ad-hoc committee has been meeting since last summer and everything is coming together. Please consider attending and show the state how great the Northeast Chapter really is. I would like to personally thank Howard Herrild and the rest of the ad-hoc committee for putting together a tremendous event. They have really put in some hours and the meeting is setting up to be a huge success. I look forward to seeing you all at our summer meeting.

- Registration opens soon for a second "Basics of LiDAR" workshop. Due to popular demand, State Cartographer's Office will be hosting a second offering of our "Basics of LiDAR" workshop. The workshop will extend over two full days, from 8:30 am to 4:00 pm, on June 12-13, 2017, at UW-Madison.

In this workshop, attendees will get hands-on experience manipulating LiDAR data using

industry-standard Esri software. Attendees will gain a broad understanding of: raster data; map algebra and raster data processing; raster data structures; raster DEM characteristics including resolution; LiDAR acquisition and data collection concepts; accuracy and error in the context of LiDAR data; limitations of LiDAR; main LiDAR application domains; bare earth applications of LiDAR; terrain analysis; TINs, break lines and contours; point clouds and LAS files; and visualization options. Attendees will also work with LAS files, using LASD to display data and create raster files and DEMs.

They have added a new section to the workshop on hydrologic modeling, where attendees will utilize and apply hydrologic modeling tools using data derived from LiDAR.

Day 1 of the workshop will be taught by Joel Nelson, of the Department of Soil, Water, and Climate at the University of Minnesota. Joel has taught similar workshops over the years many times in Minnesota. Day 2 will be taught by Jim Giglierano, Wisconsin's Geographic Information Officer. Jim has extensive background in LiDAR applications and data processing.

### **Workshop registration will open on May 15, 2017.**

You can register for the workshop -- and get more details -- on State Cartographer's Office training website.

Registration is limited to 20 due to the size of the lab facility available.

They plan to offer the workshop for a third time in August, 2017, at a location in central or northern Wisconsin. Watch the SCO website for more information.

The cost of the workshop is \$250 but a limited number of \$200 registrations are available for students enrolled at a university. Fees can be paid online through the training website.

The Professional Surveyor carries a special set of expertise that is used to protect the health safety and welfare of the public. In the practice of boundary surveying, the PLS must consider not only the exact sciences of measurement, but also the inexact art of boundaries. Many times this work must be presented in a court of law to help determine the boundaries of a parcel.

This seminar will provide some insight into what may be expected if a surveyor finds him or herself having to explain their position on a boundary question and how to give their ultimate opinion on that location of said boundaries and why they believe their conclusion to be correct.

**Lyme's Disease and West Nile in Wisconsin and How it Affects the Land Surveyor**

## TRIG-STAR NEWS RELEASE

2016-2017 TRIG-STAR

Matthew Omillian has won the designation 2016-2017 TRIG-STAR for Two Rivers High School in a competition held recently. He is the son of Michael and Mary Omillian from Two Rivers, WI. The contest was sponsored by Jeff DeZeeuw, Ryan Duckart and the Northeast Chapter of Wisconsin Society of Land Surveyors.

A TRIG-STAR is a mathematics student who has demonstrated in competition that they are the most skilled among classmates in the practical application of trigonometry. The competition for the honor is a timed exercise which is the solving of a trigonometry problem that incorporates the use of right triangle formulas, circle formulas, the law of sines, and the law of cosines. The contest helps to promote careers in surveying and mapping to students at High Schools across the country. The award is sponsored by the National Society of Professional Surveyors and co-sponsored locally. State winners also have the opportunity to participate in the National TRIG-STAR competition for awards.
